

# FULL STACK WEB DEVELOPMENT (MERN)

# WEEK 1 – Frontend Fundamentals (HTML, CSS, React Basics)

## Topics Covered

- HTML5 semantic structure
- CSS3 (Flexbox, Grid, Responsive Design)
- JavaScript ES6+ fundamentals
- React.js basics (Components, Props, State, Events)

# Assignments

## 1. Personal Portfolio Website

- Create a responsive personal portfolio using HTML and CSS.
- Include sections: About, Education, Projects, and Contact.

## 2. React Components Practice

- Build 5 reusable React components (Header, Footer, Card, Button, Form).
- Implement dynamic rendering using props and state.

## **Mini Project**

### **React Blog UI**

- Develop a small React-based blog layout displaying post cards from a JSON file.
- Add search and filter functionality.

### **Learning Outcome**

Students understand frontend design principles, responsive layout creation, and React component structure.
